Version Control	Git, GitHub
Agile Methodologies	Scrum, Kanban
Testing	Unit Testing, Integration Testing
Collaboration Tools	Jira, Trello, Asana
Responsive Design UI/	Mobile-first approach, Cross-browser compatibility User-centered
UX Design	design, Accessibility standards
CMS	Hubspot, IBM Websphere, Wix, Shopify

PROFESSIONAL EXPERIENCE

- Software Developer, iPEC Coaching, Remote** 11/2024-PRESENT
- Solely led the development and maintenance of custom HubSpot modules and components using HubL, HTML, CSS, JavaScript, and React to enhance marketing and sales functionality
 - Built and optimized workflow automations within HubSpot, leveraging custom code to streamline operations and improve cross-team efficiency
 - Developed and maintained full stack applications in Angular and C#, supporting internal platforms that facilitate organizational growth and user experience
 - Integrated HubSpot with third-party tools and internal systems using APIs to automate data flows and increase operational transparency
 - Collaborated with cross-functional teams to translate complex sales and marketing needs into scalable, user-friendly technical solutions
 - Diagnosed and resolved HubSpot-related issues, proactively identifying opportunities to improve the platform's functionality and team adoption
- Full Stack Developer, Fusion92, Remote** 11/2022-11/2024
- Led the development of a scalable website-building platform—similar to Wix or Squarespace—crafted for enterprise use, ensuring both creative flexibility and technical reliability for large organizations
 - Designed and implemented interactive user experiences using Vue.js and JavaScript, significantly improving performance and usability for clients across industries
 - Bridged front-end and back-end systems through custom API integrations, ensuring seamless data flow and functionality across the platform
 - Strengthened product quality by conducting in-depth code reviews, identifying bugs early, and suggesting enhancements to elevate team coding standards
 - Leveraged Nuxt.js and automated testing frameworks to boost speed, scalability, and resilience of web features in high-traffic environments
 - Cultivated a collaborative team culture by mentoring junior developers and training new hires, accelerating onboarding and promoting best practices in full stack development.
- Front End Developer, ByLight IT Professional Services (Veteran Affairs), Remote** 11/2021-11/2022

- Built data-driven components using React and Redux, improving application state management.
- Ensured compliance with VA.Gov Accessibility and Design principles.
- Presented features in sprint demos, receiving positive feedback for functionality and design.
- Managed repositories and performed pull request reviews, ensuring code quality.
- Developed features for the Admin Portal and Secure Messaging on the va.gov platform.

Front End Developer, *Tahzoo*, Remote

11/2020-11/2021

- Implemented complex designs and animations using advanced CSS and JavaScript.
- Managed deployments and collaborated with designers and QA engineers.
- Recognized as Employee of the Month for exceptional performance and teamwork.
- Utilized multiple Front End frameworks such as React.js, Vue, SASS, and Angular.
- Updated and maintained backend code to correspond with front-end changes.

Front End Developer, *SnapAV*, Remote

05/2020-11/2020

- Applied multiple phases of Agile software testing and Software Development Life Cycle (SDLC)
- Collaborated with designers to develop and create Front End features
- Built product and landing page templates in the CMS using HTML and CSS
- Created and managed schemas and components within IBM Websphere
- Organized, tracked, and logged task using Jira
- Completed project 2 months before expected completion date
- Successful designed, pitched and created Front End features to assist with website revision
- Worked closely with content management specialist to ensure website matches design

IT Service Desk Analyst, *Bell and Howell LLC*, Durham, NC

01/2019-5/2020

- Organized and triaged service desk tickets
- Provided end user support to over 1000 employees onsite and remotely
- Troubleshooted and repaired hard issues on user devices
- Supported SAP and other mobile applications for end users
- Performed hardware and software troubleshooting on multipurpose printers
- Imaged and configured user's PCs ensuring data was backed up and profiles are restored
- Provided support for MS Office products (Outlook, Excel, etc.)
- Configured cisco IP phones and setup workstations for employees on-site
- Created PowerShell scripts to ensure efficiency in end user support and data migrations

EDUCATION & CERTIFICATION

Coursework for JavaScript Data Structures and Algorithms and Full Stack Development

2019

Tech Degree in Full Stack JavaScript Developer at Team TreeHouse

2019

Certified in AWS

2019
